

Infinity Biometrics

Staying in prestigious hotels like yours, guests are to have high expectations. They expect the finest in service, in fine dining and in security. They are sophisticated, and so are you! You also strive to be different, to offer what is new and exciting. With the Infinity Biometrics, Elsafe is offering a unique opportunity to set yourself apart from competition, to show that you are innovative, and to discretely tell your valuable guests that you care about their security.

Elsafe's groundbreaking new Infinity Biometrics safe is the first of its kind in the industry and features the world's most advanced inroom security technology. It identifies the user and provides access to the safe through a string created from unique points in the users fingerprint. This advanced security feature virtually eliminates the possibility of entry by unauthorized users.

To use the Biometric safe, a guest simply follows instructions on the front panel to place their thumb in the channel. A LED light indicates when the print is read. They may then record additional users or close the door to securely lock the safe. Up to 10 prints may be scanned, for multiple access capability. To open the safe, the guest swipes their thumb in the reader again, which reads it for an exact fingerprint match. Upon acceptance, the safe opens automatically. Never before has something so sophisticated been so user-friendly.

FEATURES

- Revolutionary Biometrics technology
- No fingerprint stored in memory
- Audit trail capability with hand-held SafeLink unit
- Revolutionary locking system with inter-locking deadbolt mechanism
- One piece, cold-pressed curved door is over 70% stronger than flat steel door
- Extended solid steel bolt hinges for maximum security and durability
- Solid, arc-welded heavy-gauge steel construction and recessed back for superior strength and security
- Anti-tamper, auto relock function
- Three convenient standard sizes available
- Attractive, ergonomic design
- Unique modular construction for easy upgradability

THE INFINITY COLLECTION CONSISTS OF TWO MORE MODELS

The Infinity Collection's aesthetically pleasing Danish design, ergonomically curved profile and attractive 2-tone color, will make your guests appreciate the innovative styling as much as they do the advanced security platform. Infinity is especially designed to maximize security and flexibility.
